

Making Dreams Come True Systems and Goal Setting

Your commitment level is reflected in how well you take action and show up for yourself. Throughout history, humans have made the once “impossible”, possible – from electricity, to airplane flight, to cell phones, to open heart surgery – impossible dreams have become day-to-day conveniences of the modern world. And it is all the result of dreaming! Someone thought of an idea, believed in that idea, and took action to make it happen.

In this package, your child will learn that no one can make their dreams come true except for them. In this package, your child will learn a three-step process for creating the life of their dreams. They create a vision for their lives, learn how to use goal setting to take action on their vision, and learn how to use the Law of Attraction tools of visualization, affirmations, and gratitude to “program” their subconscious for success.
